Full Stack Developer and Electronic & Network Engineer with a strong background in IT infrastructure, networking, and technical support. Combines software development skills with engineering expertise in troubleshooting, system reliability, and security. Experienced in building web applications with modern technologies and leveraging AI-powered development tools to streamline workflows, solve problems efficiently, and improve productivity while maintaining code quality and independent technical judgment. Adaptable and analytical, with a focus on building reliable, maintainable, and user-focused software.

EXPERIENCE

Freelance Full Stack Developer *2025 - Actualidad*

- Develop web applications using JavaScript, React, Node.js, Express, and PostgreSQL.
- Build reusable frontend components and integrate REST APIs.
- Implement backend functionality and database interactions.
- Use Git and AI-assisted development tools to improve productivity while maintaining code quality and sound technical judgment.

Gobernación de Santander, Colombia - Back-End Web Developer *August 2023 – October 2024*

- Developed and maintained web application features using JavaScript and REST APIs.
- Integrated APIs to retrieve and update data, implementing validation and error handling to improve reliability.
- Supported frontend-backend integration, application testing, troubleshooting, and maintenance.

ENDE ANDINA, DIMA Ltda - Network & IT Support Engineer *2016 – 2022*

- Managed and maintained network devices, including routers and switches, ensuring reliable connectivity.
- Troubleshot network, hardware, software, and system performance issues.
- Supported server administration, IT infrastructure operations, and user access management.
- Collaborated with IT teams to resolve technical incidents and maintain secure, stable systems.

EDUCATION

- Universidad del Valle - Postgraduate Diploma in Full Stack Web Development — 2026
- No Country Academy — Full Stack Web Developer — 2024
- Soy Henry Academy — Full Stack Web Developer — 2022 - 2023
- Universidad Mayor de San Simón — Bachelor's Degree in Electronic Engineering — 2009 – 2015

MOST RELEVANT CERTIFICATIONS

- Cisco Certified Network Associate Routing & Switching 200-125 CCNA, CISCO - 2017 - 2020
- HPE Sales Certified - Hybrid IT Solutions, HPE - 2019
- Aruba Certified Mobility Professional, Aruba Networks - 2017
- Dell EMC Partner Program Server Credential, Dell - 2018
- Postgraduate Certificate in Higher Education Teaching, Universidad Mayor de San Simón - 2018
- Soft Skills - Expert in Business Skills, CAINCO Chuquisaca - Cimara de Industria y Comercio de Potosí - 2020

- Leadership in Emotional Intelligence in Organizations, Cimara de Industria y Comercio de Potosí - 2020

SKILLS

- **Tools & Technologies**: JavaScript, React.js, Vite, Redux, Node.js, Express.js, PostgreSQL, REST APIs, SQL, Sequelize, Tailwind CSS, Git, GitHub, Postman, Docker, GitHub Actions, CI/CD, AI-Assisted Development, Network Security, TCP/IP, Routing & Switching, IT Infrastructure.

PROJECTS

App BiT

Web application for exploring digital inequality through interactive maps, data visualizations, and PDF reports. Developed as part of a collaborative team project.

Technologies: React, Node.js, Express, PostgreSQL, Supabase, REST APIs.

FoodApp — Bolivian Market

Built a full-stack e-commerce app for traditional Bolivian food, featuring product search, shopping cart, user authentication, online payments, and an admin dashboard.

Technologies: React, Node.js, Express, PostgreSQL, REST APIs, Docker, GitHub Actions.

Gobernación de Santander, Colombia - Desarrollo de una Plataforma Web para la Gestión y Seguimiento de Proyectos de Fiscalización, Accesible Local y Remotamente

- Developed and maintained web application features using JavaScript and REST APIs.
- Integrated APIs to retrieve and update data, implementing validation and error handling to improve reliability and data integrity.
- Supported testing, troubleshooting, and ongoing maintenance of the application.
